FROM : BSO-B-1065 J Bldg.

DATE: 27 January 1954

SUBJECT: Unsatisfactory filing cabinet

It has come to the attention of this office that the metal filing cabinet procured from the General Cabinet Co. of Central Falls, Rhode Island, and carried on our records as item:

7110-005-2114 Filing Cabinet, Cap, size
steel, 5 dr., w/o lock &
a/compressors

is an unsatisfactory item.

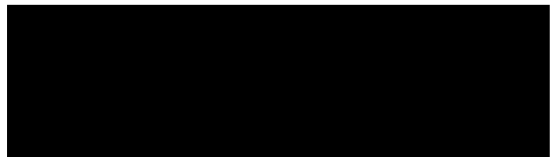

The said Co. has used as a drawer support a 90 degree angle bar in lieu of the flat iron drawer support widely used by cabinet manufacturers. The lower lip of this 90 degree support comes in constant contact with the metal tabs on the folders being used therein, and the result is a disruption of the files. The files are either pulled out of position, are torn, or the tabs are mutilated beyond recognition.

The complainant in this area has requested that this cabinet no longer be issued to them and those cabinets of this make presently being utilized be replaced.

In view of these complaints and the grave consequences which can result from file disruption it is recommended that this item no longer be procured for stock.

It is requested that this office be authorized to initiate the replacement of fifty (50) each of said item for FI/RI.
